EMPLOYMENT

Research Fellow in Exoplanets

February 2025 -

The University of Birmingham

CandY ERC project (PI: Amaury Triaud)

Research Assistant

January 2025

The Open University

Internal funding awarded to write a paper for REF submission

EDUCATION

PhD in Astrophysics

October 2021 - January 2025

The Open University

Thesis title: *Planetary system characterisation for the Dispersed Matter Planet Project, and Beyond*. Supervised by Carole Haswell, John Barnes, Jo Barstow, and Joe Llama (external).

Physics and Astronomy MSci

2016 - 2021

University of Glasgow

School of Physics and Astronomy

First class integrated masters degree. Masters project: *Identification and Classification of RHESSI Solar X-ray Microflares Using Machine Learning*.

AWARDS AND HONORS

Mackay Smith Prize (Physics and Astronomy)

Year: 2020

University of Glasgow

Awarded to the best performing combined Physics and Astronomy student (4M).

Non-academic:

Duke of Edinburgh Gold Award; Chief Scout's Gold Award

GRANTS AND FELLOWSHIPS

E.A. Milne Travelling Fellowship

2022

Royal Astronomical Society

Grant awarded to facilitate an observing trip to La Silla, Chile.

CONFERENCE ACTIVITY

Talks

Combing the Brown Dwarf Desert with Gaia DR3.

3 July 2023

National Astronomy Meeting 2023, Cardiff

The extreme S-type binary planetary system DMPP-3.

14 Sept 2022

UK Exoplanet Community Meeting 2022, Edinburgh

Posters

Three close-in planets with a long-period Saturn- mass companion: optimizing RV planet detections.

17 June 2024

Exoplanets 5, Leiden

&

9-11 April 2024

UK Exoplanet Community Meeting 2024, Birmingham

TEACHING EXPERIENCE

SXPS288: Remote experiments in physics and space

(2022, 2023 & 2024)

The Open University

Radio telescope operator in Oct-Nov 2022, supervising students using the OU ARROW radio telescope during their experimental work. Night duty astronomer in Oct-Nov 2023 & 2024, for students using the OU PIRATE and COAST robotic telescopes in Tenerife. Worked as emergency cover for telescopes during the observation windows.

S384: Astrophysics of stars and exoplanets

(2023)

The Open University

Assisted the module team in production of a Case Study on transiting exoplanet demographics in the JWST era, for the above Stage 3 module.

S385: Cosmology and the distant Universe

(2022)

The Open University

Critical reviewing of Python activities that make up part of a new Stage 3 module on cosmology.

MISC. EMPLOYMENT

Landscape gardener

(2015-2021)

Dave Loggie Gardening Services Ltd.

Gained work experience each summer during undergraduate degree, working in garden maintenance.

Freelance gardener

(2016-2021)

Worked for various clients to carry out garden maintenance and perform a range of duties depending on what the customer required. Provided valuable experience in project planning and time management.

SKILLS

Scientific Computing

Fluent in using Python in a Linux-based environment. Skills in computing include use of numerical simulations (N-body stability analysis of extreme planetary systems), parameter space exploration (via MCMC methods or Nested Sampling algorithms), data analysis (e.g., of time series data with GLS, MLP, BLS period searches). Also experienced with running software developed in C++ and Java.

Telescope Proposal Preparation

Substantial involvement in proposal preparation for various telescope calls, including ESO and OPTICON. Recently, an ESPRESSO proposal where I was co-PI was accepted during a period where time was oversubscribed by a factor of 4.2.

Journal Manuscript Review

Reviewed for Astronomy and Astrophysics in early 2024, alongside C. Haswell: *"We are very thankful to the anonymous referee for her/his thorough and courageous reading that led to significant improvements of this article"*

ESO distributed peer review

Reviewed 10 proposals for P112, P116
